CLASS PROJECT

Let's put your learning into action. We'll work with the client below to redesign their old website interface. There are assets you can download or you can use your own. Once you've created your design you have permission to use the brand in your own portfolio.

Client:
Bring Your Own Laptop - Online Video Training.

Description
Develop a new design for their student facing video page. Here is an example of the page they want re-imagined: www.bringyourownlaptop.com/xdproject

There is a folder 'class project' with logo assets you can use. You can use course titles & text from the example page above. There is no restrictions on images, colors or fonts.

Option B: You can run the same project with your own idea/business/client.

Who is this for?
Creatives - This product is used by creative individuals i.e graphic & web designers who want to upgrade their current skills.

Feature List (Product requirements)
• Video Player
    The site should be video centric. Viewing and movement to the next video should be the main priority for the design.
• Navigation
    HOME, COURSES, RESOURCES, CONTACT, FAQ, LOGIN, SIGNUP
• Course title
• Video title
• Comments
• Video Transcriptions
• Search bar
• Download course related files 'Download Exercise Files'.

Competitors & Product Inspiration
• Lynda.com
• Teamtreehouse.com
